Education

- Fall 2019 – **M.S. Geography**, *Oregon State University, Corvallis.*
Spring 2021 Research focus in climate risk and coastal climate adaptation mechanisms. Thesis work involving spatial econometric modeling and measurement techniques of migration networks and housing markets with climate hazards. Worked as a Teaching Assistant offering in-class and online instruction in a variety of disciplines.
- Fall 2014 – **B.S. Environmental Management & Protection**,
Spring 2018 *California Polytechnic State University, San Luis Obispo.*
Emphasis in Climate Change Science and Geospatial Technologies.
Graduated *cum laude*.

Experience

- Spring 2021 – **Senior Analyst**, *Evergreen Economics*, Portland, OR.
Present Perform in-depth research and data analysis to support a variety of client projects including energy program evaluations, metered energy usage comparison, and survey response summarization. Provide integrated static and web-mapping GIS solutions tailored to client needs. Utilize novel and industry-standard statistical modeling approaches to survey analysis and billing impacts.
- Fall 2018 – **Interconnection Representative**, *Sunrun Inc.*, San Luis Obispo.
Summer 2019 Acted as a company liaison to regional electrical utility clients in order to efficiently and effectively facilitate residential solar interconnection and other project operations tasks.
- Fall 2017 – **Orientation Board Member**, *New Student & Transition Programs*,
Fall 2018 Cal Poly, San Luis Obispo.
Interviewed, hired, and managed a staff of 50 student leaders. Actively developed and executed leadership development programming in the training of approximately 900 student orientation leaders. Simultaneously created and implemented orientation programming for over 5,000 new students and supporters.
- Summer 2017 **Research Assistant**, *National Science Foundation*,
Oregon State University, Corvallis.
Worked closely with a faculty adviser on a geospatial analysis project titled: *Habitability at the frontlines of sea level rise: a spatiotemporal analysis of settlements and coastal inundation in Bangladesh between 1985 and 2015*. Gained geospatial software and programming skills while applying critical thinking to a global geographic research project.

Skills

- GIS Mapping Software: ArcGIS, QGIS, Google Earth Engine, R
- Programming Languages: Proficient in R, JavaScript, Python, SQL
- Spoken Languages: English, Spanish (Proficient)
- Statistical software: R, Stata, Microsoft Excel
- Document processing: L^AT_EX, Microsoft Office
